## About AAHFN-CB

Offering basic heart failure certification was initiated by the original AAHFN Board of Directors in 2004 and was a personal goal of the 13 individuals who banded together to facilitate the creation of the AAHFN organization in December 2003. In 2010, the certification examination was developed by the AAHFN-CB (American Association Heart Failure Nurses- Certification Board) under the auspices of Applied Measurement Professionals, Inc. (AMP was acquired by PSI Services in 2015.). The first CHFNC examination was administered in June 2011. The purpose of Heart Failure Nursing Certification is to promote the highest standards of practice within the specialty, to validate attainment of a common knowledge base required for clinical heart failure practice, and to encourage and promote continued educational growth. The CHFNC-K certification was created in April, 2015 to encompass the knowledge based non-clinical nurse that impacts the heart failure community through administration, education, research, quality, industries, organizations and other quality roles. The examination is the same, but required criteria is different for the CHFNC (clinical nurse) and the CHFNC-K (non-clinical nurse).

## Independent Testing Agency

AAHFN-CB has contracted with PSI Services to assist in the development, administration, scoring and analysis of the heart failure certification examination. PSI is a leader in the testing industry, offering certification, licensing, talent assessment and academic solutions worldwide.

## Nondiscrimination Policy

The AAHFN-CB and PSI does not discriminate among candidates on the basis of age, gender, race, color, religion, national origin, disability, marital status or any other protected characteristic.
